

Eurocode 4: Design of composite steel and concrete structures

BS EN 1994 has three parts covering common rules and rules for buildings, structural fire design and bridges. It needs to be used together with Eurocodes 2 and 3 for concrete and steel respectively.

The specific parts, and the relevant withdrawn British Standards, are:

- BS EN 1994-1-1- General rules and rules for buildings. Replaces BS 5950-3.1 and BS 5950-4
- BS EN 1994-1-2- General rules. Structural fire design
- BS EN 1994-2- General rules and rules for bridges. Replaces BS 5400-5
